

## ETHOS 2.0 WITH FIVE STAR BASE

With active learning, students engage with ideas — and each other — in meaningful ways. Activities like problem-solving, group discussions and quiet study cater to every learning style and, ultimately, the understanding and retention of class concepts. Active learning requires a dynamic classroom where the physical environment responds to the curriculum, and the right seating, like the Ethos Series from Haskell, supports the many different layouts required in today's flexible classroom. The 5 star and stool base options combined with the classic and comfortable shell design work in tandem with the other models in the Ethos series to support lecture, collaborative and group teaching modes so the class stays focused on what really matters: education.

## 21ST CENTURY CLASSROOM

The Ethos Series 5-star base model affords a generous range of height adjustment for those situations where student / teacher comfort and choice are top priorities. The stool base option supports the design of learning spaces where tiered seating or café height tables are used, all the while keeping with the Ethos aesthetic. Blending flexibility like 360-degree swiveling capability and easy movement the Ethos line of seating supports the dynamic pedagogies required for student centered learning.
