

ROVER TABLE SPECIFICATIONS

The makerspace movement is becoming a powerful part of many school district curriculums. Schools are repurposing classrooms, renovating computer labs, and retooling media centers to accommodate the tools required for these creative spaces. But for schools who do not have the extra space to give up, Haskell has created the Rover Table. Engineered to be easily transported across the hall or across the district, the Rover table is the ideal solution for a shared maker curriculum.
