

ASSEMBLE SERIES

Learn. Think. Do.™

haskell

Bring everyone to the table with the Assemble series for Haskell Office, this collection includes something for any interior, whether it's a conference room, classroom, media center, or café. With a host of surface and support options, the Assemble series easily fits into corporate, educational, and hospitality environments. Combining the ability to foster collaborative interaction while incorporating sleek, high-design, our selection of tables are ideal for those seeking beauty and function in any communal settings. With Haskell's focus on uncompromising customer service and manufacturing expertise, getting everyone together has never been so simple and worry-free.

conferencing and multi-purpose

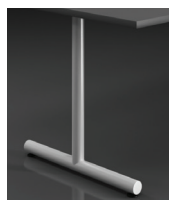

The Assemble series offers all the components that make bringing together people and interiors easy. With its comprehensive collection of conference and multipurpose tables, combined with a variety of leg options and edge profiles, Assemble meets the needs of any environment.

training & learning environments

The extensive options built into the Assemble series make putting together any space, from a classroom, training room or media center, as easy as identifying the environment's needs. Electronic options range from a fully powered table with integrated cable management to a basic, quick-access cable management system. Depending on the demands of the space, our tables can be constructed with folding or nesting options.
